Inflation-Proof Your Portfolio: How To Protect Your Money From The Coming Government Hyperinflation

Synopsis

The must-have guide on how to protect yourself during the coming age of hyperinflation. The Petersen/Pew Commission on Budget Reform recently warned that the national debt was expected to grow from 40 percent of the gross domestic product (GDP) in 2009 to 85 percent in 8 years, 100 percent in 12 years, and 200 percent by 2038. In other words, in just a few years the U.S. will owe twice as much as it produces. Since no conceivable level of taxes and borrowing will enable the country to service such an enormous debt, it is inevitable that government will turn to the same tricks its antecedents have been playing since Ancient Rome: debasing the dollar and letting inflation run rampant. *Inflation-Proof Your Portfolio: Protect Your Money from the Coming Government Hyperinflation* is your guide to understanding the debt crisis and rising inflation, packed with the key tools you need to protect yourself from the fallout. Neither an economic treatise nor a collection of specific investment advice, this audiobook is intended as a resource to help empower citizens to take action to protect their money from the coming government-induced hyperinflation. Get the information you need to formulate your own plan of action to protect your investments. The U.S. dollar is almost certain to sustain a run of extremely high inflation over the next decade because of continued huge government deficits and unfunded liabilities, and this audiobook is the resource you need to be ready.

Book Information

Audible Audio Edition

Listening Length: 4 hours and 39 minutes

Program Type: Audiobook

Version: Unabridged

Best Sellers Rank: #66 in Books > Business & Money > Economics > Inflation #286 in Books > Audible Audiobooks > Business & Investing > Economics #920 in Books > Audible Audiobooks > Business & Investing > Personal Finance & Investing

Customer Reviews

If you're worried about inflation, this book is very useful. It covers the usual topics like gold, silver and precious metals, but then gets into a large number of other inflation hedges that are less

familiar, like stamps, timber, farmland and foreign currencies. Voda believes that the government is so much in debt and has so severely over promised on entitlements that the only way out will be massive inflation. He gives a number of scenarios for inflation, anywhere from mild inflation to hyperinflation and so it's sort of pick or choose what strategies you might want to follow.

You MUST read this book if you are the least bit concerned about managing/saving/investing your hard-earned money and investments in this volatile world of financial uncertainties. This well-researched book helps you cut through the "noise" of opinions and speculations with sound advice and documented examples that will help you make sense of worldwide governmental financial decisions and actions as it exists -- and how you can benefit by making the best choices for your own portfolio. Highly recommended.

I read Voda's book with interest and no small degree of alarm. There was a lot of useful information, all very concisely arranged. There was also a good deal of eye-opening information. Regardless of what the news pundits keep telling us, it is now very clear to me that our economy is slowing down and America is getting poorer. Voda's analysis hits this trend squarely on the head. When I first entered the work force, the question was: "Which of the many appealing job offers do I take?" Now the question is: "Can I get a job at all?" People need to stop viewing the economy through their various ideological filters and start dealing with the economy as it actually is. Voda's book goes a long way towards helping us take the filters off--regardless of our particular political persuasion. Right now, his words are merely cautionary. In the not so distant future, they may become simple descriptors of America's economic reality.

David's book is helpful, especially if you have not had inflation on your radar screen. He gives a lot of ideas about methods to consider to protect yourself. I found some of the items to be rudimentary and hoped for more real actions to protect my savings. In the end, David's suggestions are good to get you to research more and develop a proper plan to protect your portfolio. One quandry out of David's discussion is the potential for another crisis and deflation prior to an inevitable inflationary environment due to the unprecedented stimulus provided by the Fed. I think David should have outlined that risk so his readers do not over-commit their entire portfolio to an inflationary bias before it happens. It is always best to hedge your bets! Good luck with your planning, I still am not sure what to do.

"Inflation Proof your Portfolio",met the expectations I had, and found very helpful content. Used it as a Christmas Gift to my husband. He was very pleased with it.
